

FOR IMMEDIATE RELEASE

Diamond Wire Technology Appoints New Saw Engineering Division Manager

Colorado Springs, CO – September 2008 – Diamond Wire Technology (DWT), the oldest manufacturer of diamond wire and diamond wire saws, has promoted Dick Archer to Saw Division Engineering Manager.

Archer has been with DWT since 2000 and has provided expertise in the areas of Manufacturing and Engineering to include: Plant Management, Production Management, Engineering Management, Field Service Engineering, Process Engineering and Project Management. Archer has been an integral part of developing and maintaining successful business partnerships with customers, as well as a network of world wide distributors. Prior to joining DWT, Archer had 20+ years of experience working with a wide range of start-up and mid-sized manufacturing companies in the Midwest. Archer holds a technology patent and was instrumental in the development of a second technology patent while working for a Tier 1 supplier of Industrial Web Handling and Converting Equipment to 3M Company in Minnesota. Archer's background in slicing technologies, heavy industrial equipment, and custom machine tools will prove instrumental as DWT launches a new line of value-added cropping and slicing tools for the solar industry.

About Diamond Wire Technology:

Diamond Wire Technology is the originator and market leader in diamond wire cutting, with over 40 years experience. In addition to making diamond wire from 150 micron to 500 micron in diameter, Diamond Wire Technology maintains a line of diamond wire saws designed to enhance performance and lower cost.
